

## ALBERT'S TERRITORY

Albert knows every corner of his territory and protects it wisely. Flying uses energy! A smart territory is big enough to feed him, but small enough to guard without wasting strength.

### STATION 4

Challenge: Look through the telescope into Albert's territory. Three symbols are hidden there. Find them and punch the correct circle.

Below the ViewingPlatform Stilluplat

## THE EAGLE'S SUPERPOWERS

Eagles have incredible abilities. They can spot tiny mice from high above, strike with lightning-fast, powerful claws, and pull off amazing aerial acrobatics. But one of these powers is a fake - can you spot it?

### STATION 5

Challenge: Three powers are real, the others are not. Only the true superpowers will lead you to the correct symbols.

KraftPfad

## ALBERT'S ENEMIES

Albert is strong and has almost no natural enemies - but even he has rivals. The ravens give him a hard time, especially their leader Oscar. The sky over Mayrhofen still belongs to him - for now. But Albert is ready for the final showdown.

### STATION 6

Challenge: In the tunnel, you'll find the final three symbols. But watch out - only the correct combination will take you further.

ON THE CODE PLATE

## VICTORY OVER MAYRHOFEN

Albert has fought and won - Oscar is defeated, and Mayrhofen is free! But before Albert can be crowned again, he needs your help one last time: find the secret word that seals his victory.

You've completed all the challenges - now comes the final step. Place your punched flyer on the letter board. The holes reveal hidden letters, and only those who look closely will find the secret word.

### STATION 7

Challenge:

1. Place your fully punched flyer on the letter board.
2. Only certain letters remain visible - read them carefully! They spell the secret word that will make Albert king again.
3. Found the secret word? Then mention it at the ticket office at the valley station and grab your goodie!

# ALBERT ADLER CHALLENGE

# WELCOME TO THE ALBERT ADLER CHALLENGE!

Ready for an adventure between  
the sky and the mountains?

Albert Adler has lost his kingdom and the clever raven  
Oscar has chased him away.  
But Albert won't give up!

Now it's YOUR turn:  
Master all seven stations,  
collect the secret symbols,  
and find the magic keyword  
that will make Albert the  
true king of the skies  
again.

At each station, solve  
a puzzle, find the  
correct symbols, and  
punch the matching  
code into your flyer.

Let's go!

Start by finding out  
where Albert truly  
feels at home!

## ALBERT'S HOME

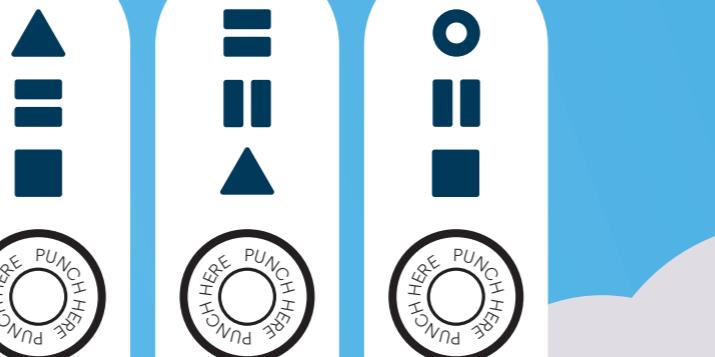

Albert was chased away from his nest and took flight - circling over France, hunting in Switzerland, and soaring all the way to Italy. But deep in his feathered heart he knew: only Mayrhofen is truly home.

### STATION 1

**Challenge:** Three panoramas show you stunning mountain worlds. Each one has a hidden symbol, but only the right symbols show Albert's real home. Find them and punch the correct circle.

ViewingPlatform Eagle's Eye

Punch the circle with the correct symbol-combination.

## THE EAGLE'S PREY

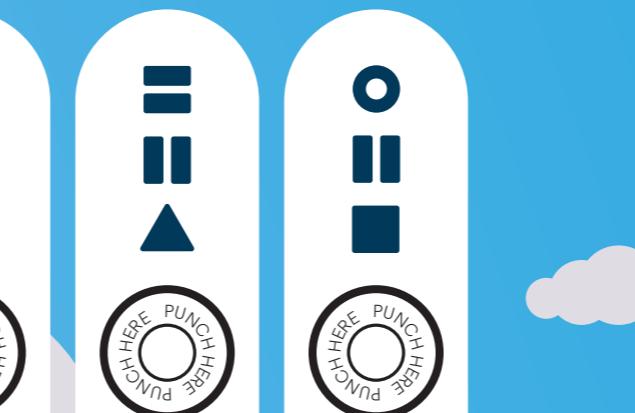

Albert needs to hunt to survive, but not every animal makes good prey. If it's too big, it costs him too much energy. If it's too small, it won't fill him up. Can you figure out what's on Albert's menu?

### STATION 2

**Challenge:** Spin the boards until three matching prey animals appear. They'll reveal the symbols you need to punch.

ViewingPlatform Zillertal

Punch the circle with the correct symbol-combination.

## THE SIZE OF THE EAGLE

Eagles are among the largest birds of prey, but others have impressive wingspans too - like Laika the buzzard, Albert's friend, and Oscar the raven, his rival. Time to do some math!

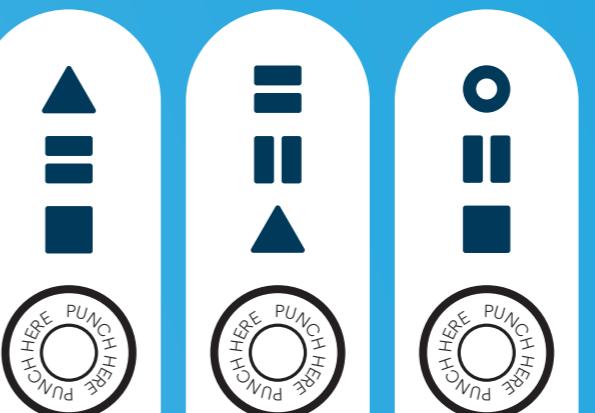

### STATION 3

**Challenge:** Use the rope measuring tape to measure one wing. Then:  $length \times 2 = \text{wingspan}$ .

This is the only way to find out which symbol belongs to which bird and which circle to punch.

Below Lake AhornSee

Punch the circle with the correct symbol-combination.
