MUOTATHALER WETTERSCHMÖCKER

WETTERSCHMÖCKER
The home-grown 'Wetterschmöcker', sometimes known as the 'Muotathaler Wetterfröschе', is a group of hobby meteorologists from the inner Schwyz region. While their own observations of the outdoors are certainly an ingredient of their weather forecasts, the exact recipe is a well-guarded secret. Learn more about weather, forecasting, and the art of observing nature during an entertaining talk with one of these dyed-in-the-wool Schwyzer veterans. The 'Wetterschmöcker' present their forecasts with a wealth of wit and charm at their twice-yearly gatherings.

HISTORY
The association, formally named the Inner Schwyz Meteorology Association, was founded in the Muotatal Valley in 1947. One of the catalysts for the group's formation was the emergence of radio: people feared that if we all simply tune into the weather forecast, the art of observing the natural world and predicting the weather would be lost to time.
