valuable cultural assets

Who we are

The association

The Furka Mountain Line Association was founded under Swiss law in 1983 after an event organised by railway enthusiasts at the Swiss Museum of Transport in Lucerne.

Since 2001, it has been organised as an umbrella organisation with a total of 21 independent sections in Switzerland, Germany and the Netherlands.

Activities

The sections, with a total of around 6000 members, are actively involved in the reconstruction of locomotives and historic passenger cars, in operations and administration, as well as in the structural and operational maintenance of the line. They provide a large proportion of the volunteer helpers for the work on the Furka and in the workshops in Aarau and Uzwil. They also promote the Furka steam railway at trade fairs, exhibitions and other events and organise club events such as excursions to the Furka or to other railways in Switzerland and neighbouring countries. Many sections also have a group for talking shop about the steam railway and other topics.

The umbrella organisation is managed by the central board, which serves as the point of contact for all association matters and represents the interface to the other institutions of the Furka Mountain Steam Railway. You can find the respective contacts and people in your region on the website under «Contact».

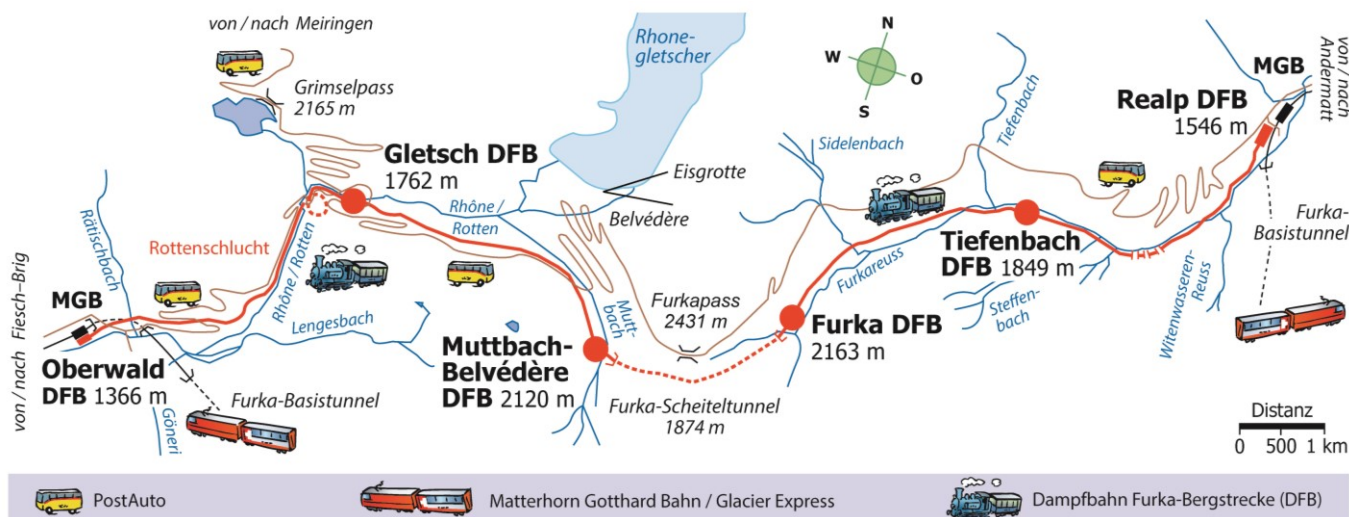

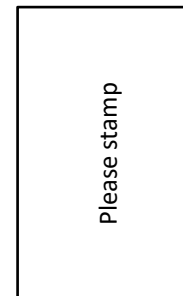

Why join us?

The Furka Mountain Railway Association offers its members an environment in which they can actively support the railway as 'Froni' in line with their inclinations and abilities and deepen contacts with like-minded people.

With donations in kind, time and money from its members, the association makes a significant contribution to the preservation of the cultural heritage of a professional and nostalgic volunteer railway with historic rolling stock in the unique high alpine landscape between Oberwald, Gletsch and Realp.

Join our association as one of more than 6500 other Furka enthusiasts and steam railway fans in Switzerland and abroad.
